# Understanding Modern Dental Protection

Despite significant advances in x-ray imaging equipment and procedures, it is still considered common practice to offer lead aprons and protective apparel to patients during dental imaging.

Even though the scope of scatter radiation and exposure time has decreased in recent years, patients simply expect to see protective apparel when x-rays are taken. There is still a perception of danger and many patients may feel apprehensive when shielding is not provided.

Educating patients on modern procedures and safety is of course extremely important. However, simply offering the option of protection may prove to be the most efficient and effective way to provide the best patient experience.

There's no such thing as too much protection with x-ray! Since radiation is accumulative, it's always important to keep any exposure to a minimum. Studies demonstrate that every x-ray a person has during their life will add to their total body load. That body load never decreases.

Certain physical variations, such as thyroid issues or pregnancy, increase the need for maximum protection. Existing thyroid issues are greatly exacerbated by any exposure to radiation. A pregnant woman should always have extra protection for a fetus if any exposure to radiation is likely.

In many areas, laws regulate the use of protective devices during any imaging procedures. Some states mandate protection at all times regardless of the procedure. Other states vary levels of protection and when they are required. It is extremely important to know the laws and regulations of your local area.

Whether certain levels of protection are absolutely necessary can be debated, one thing is clear. Any and all things that can be done to protect a patient's comfort and emotional well-being are the top priority.

Techno-Aide is proud to carry an extensive line of Dental Radiology Accessories designed to meet immediate and long term imaging and positioning needs.

With over 40 years of high quality, USA based manufacturing experience, Techno-Aide is pioneering the paths to better radiology accessories for the dental market.
