Techno-Aide Best Fit Sizing Guide

Techno-Aide Sizing Charts are based on universal body sizes. But let's face it... nobody is average! A great apron won't fit like a pair of jeans or a suit. **Aprons are meant to fit multiple body types and sizes!** So, in order to get the "Best Fit for You," please consider the following when measuring yourself for a standard garment:

PROTECTION IS PRIMARY: Why are you wearing an apron? Protection from radiation! At Techno-Aide, we understand that comfort is important, but never as important as protection. Our aprons are designed to keep the user safe above all else. But who says you can't add a little style and comfort along the way?

CIRCUMFERENCE CONSIDERATIONS: When measuring for a Front Protection Apron, measure from one side of the widest part of your body, around to the other side - the actual distance you want protected. Then, tell us if that measurement is your chest, tummy, or hips.

HEIGHT CONSIDERATIONS: In relation to your circumference, do you have a long or short torso? We want to make sure that you are adequately protected!

Notes About Measuring!

Sizes shown for apparel (other than front protection) are **ACTUAL** body measurements.

All lengths are from the **sternal notch or waist** downward, depending on the garment.

One Size to Fit Them All!

Don't get hung up with complicated customization!

Standard sizes are designed to fit nearly every body type. **As shown to the right**, our standard Large Flex-Guard can be worn properly by three people with completely different body types!

Use our expert guides to find the perfect size today!

*Each person is wearing a standard (non-custom) large Flex-Guard apron appropriately. Photos provided to show standard sizing fit. Apron shown in default 61-Sapphire material.
