## Mammography magnification Viewer

The Mammography magnification viewer enhances perception of subtle radiographic detail by blocking ambient light, contrast perception is improved and fine glandular tissue differences are observed more readily. Perfect for mammography. It magnifies and creates a focused field of view. Also reduces eye strain when reading large numbers on images and facilitates diagnostic interpretation. Dimensions: 9.5" long x 6" wide x 3" thick. Lens can be removed for cleaning or changing by simply removing the two retaining nuts and lifting lens out. Keep in mind when ordering, with higher power lenses there is a corresponding reduction in viewing distance as the magnification increases.
